

K¹² Inc.

Situation K¹² offers comprehensive curriculum, technology, community building, professional development, and consulting services designed to support online school systems and programs. Public and private schools, as well as individual households, use K¹² products and services to provide an engaging and highly effective online education experience for students in grades K–12. Students who have benefitted from K¹² materials include homeschooled students, struggling students, advanced learners, students who are from military families or reside overseas, gifted athletes and performers, and homebound students.

K¹² serves students in all 50 states and over 70 countries, and has partnered with over 2,000 school districts. It has invested over \$240 million in curriculum and learning systems, and has delivered over 2.5 million courses online.

Solution Channel Communications was selected to produce extensive collateral materials and assist in the evolution of its brand. The agency will provide copy and design services in the development of brochures and sales tools targeting school and education system administrators.

"We can't wait to get started working with K¹²," said Cory Farrugia, president and CEO of Channel Communications. "K¹² is a fast-moving company in a rapidly expanding field, and our experience in the education arena should serve as a solid foundation for K¹² to further strengthen its market presence."

Result To date we have designed numerous pieces of collateral. The company continues to grow and will rely on Channel to design and produce new marketing materials.

K¹² Partner Program for Full-Time Online Education

Services, Tools, and Expertise to Help Your School or District's Online Learning Program Thrive

Client Services: Unparalleled Support is Always Accessible

Our Client Services Team is in place for one reason—to ensure your programs are productive and successful. Given the successful implementation of full-time schooling by K¹² in 20 states, we've encountered the same issues you likely to run into, so we can help shorten your learning curve and lead our expertise when and where you need it.

In addition to the support, we also offer Our Online School Solutions one-stop support site, onlineschoolsolutions.com, with access to a variety of resources to help you increase online program success, including:

- Quick links to key management and reporting systems you use every day
- Details on professional development opportunities offered by K¹²
- Information about upcoming web seminars, industry events, and professional development programs

EdutuLink

A Robust Online Network of Educators, Information, and Support

Once you partner with K¹², your school mentors, teachers, and administrators have access to this vibrant online community, in order to connect with other educators who have embarked upon their own online education journey. K¹² teachers and administrators are available 24/7 to answer questions and provide support. K¹² members find the support they need for a successful school year. You can:

- Connect with other K¹² faculty who share common interests via direct prof-

A Growing District Also Increases Its Options

A Colorado Springs public school system found online education to be the ideal way to keep students on the path to success. "We are a very crowded school district struggling to pass bonds," says David Knouse, Superintendent of the Colorado Springs School District. "It has been wonderful reading everyone's profile and collectively there appears to be a great deal of experience and wisdom."

Carol Knouse, Director of Virtual Education and Teacher Programs for the North Carolina Association of Independent Schools

Technology and Systems: Flexible and Convenient

Our online solution integrates many all-in-one learning management system providers, including Blackboard, Moodle, eCollege, Desire2Learn, and Brightspace. You can maintain the relationship with a hosting provider on your end, or K¹² can take care of this aspect for you. For K¹²-hosted customers, we offer online enrollment and reporting tools that are easy to use.

Managing enrollment is made easy through:

- Self-service convenience
- Flexibility
- Quick set-up—get students up and running within 2 hours (vs. 48-72 hours if we handle enrollment)
- Batch imports of large numbers of students

All Aventa reporting enables you to:

- Receive weekly email reports—including a progress report with a high-level snapshot of all students
- Pull your own reports in-between weekly "pushes" of progress reports
- Monitor student engagement—identify students that may be at risk of not succeeding
- See student progress in near real-time (data updated daily)
- Examine historical trends and performance history
- Generate reports on demand

Plus, our rolling admissions support provides even more flexibility—students can enroll anytime, and processing is complete within 72 hours.

Our rolling admissions is even more flexible—get students up and running within 72 hours.

Training: National Professional Development

This ongoing training is for K-12 and high school teachers who have completed new teacher training. Training may be synchronous or asynchronous. Topics will vary from year to year.

- Changes and updates to K¹² systems
- Circular training
- Content delivery strategies
- Virtual instruction skills
- Individualized instruction
- Assessment and interim
- Developing the partnering relationship with families
- Targeting state standards for instruction

Training: National Teacher Induction (year-long)

Startup training for newly hired teachers and third-year teachers includes:

- Choice of three courses: K-8, K-6, and one for high school, which are approximately 40 hours each
- Design utilizing both synchronous and asynchronous components, including video, audio, and written instructional methods and practices utilized within the K¹² curriculum
- Equip new teachers with the skills they need to begin teaching right away
- Use of K¹² proprietary systems
- Role of the teacher
- Working with Learning Coaches and mentors (families of students)
- Virtual instruction
- Training on school-specific or state-specific policies and procedures is not included

COMMON CORE STATE STANDARDS

Courses, Resources, and Support for Ongoing Compliance

www.k12.com 

PREPARE

Count on K¹² to Ensure You Are Prepared

K¹² is committed to aligning our curricula to the Common Core State Standards. When the time comes for your district to implement these standards, you can be confident that with our courses, you will be in compliance.

- Standards are Our Priority** – Aligning our curricula to standards has always been part of our mission. As new standards are released, we ensure they are appropriately aligned to the latest state and national standards.
- Aligned on Time** – Since June 2011, we have developed each new course to align specifically to the CCSS. In addition, K¹²'s actively-reviewed courses developed prior to June 2011 meet CCSS. Further, as new specific standards are defined going forward, we will make sure our courses are aligned to them as quickly as possible.
- Be Step in the Future** – As the core standards grow beyond math and language arts to other subject areas, K¹² will stay in sync with these new standards development to continue to provide you fully-aligned curricula.

We need all of our students to be prepared and ready to compete with students from around the world. Common standards that allow us to innately:

"This work by the states to develop shared standards for college readiness is an absolute game-changer."

—Zachary Blau

Extensive Course Catalog

The most extensive in the K-12 industry, with more than 150 unique online courses, K¹² offers a wide variety of courses for schools and districts spans our family of curricula.

- K¹²Curriculum for grades K-12**
- AveoLearning by K¹² for middle and high school**
- Anywhere Learning System by K¹² for remediation or acceleration for grades K-12**
- MiddleburyInteractive Languages for grades K-12**

Our curriculum includes multi-media events, like Con, Compete, Connect, Hover, AFA, Foundations, Credit Recovery, and more. MiddleburyInteractive offers highly language arts courses and titles, as well as other subject areas, are developed in alignment with the CCSS.

K¹² also provides access to more than 100 experts, highly experienced teachers who are available to provide you with the support you choose to offer. We help you quickly find a temporary or permanent online teaching solution. Your students will receive high-quality instruction from certified, licensed educators, over live feedback, or email assistance if phone, chat, or email.

Educate^{it} – This online community connects you with hundreds of educators who are also interested in professional development opportunities. Educate^{it} is a great place to find forums and share best practices with your peers around the world.

Professional Development – We've trained more than 2,000 districts nationwide in our professional development sessions, over live feedback, or email assistance if phone, chat, or email.

Edutain^{it} – This online community connects you with hundreds of educators who are also interested in professional development opportunities. Edutain^{it} is a great place to find forums and share best practices with your peers around the world.

Teaching & Learning Model – K¹² has trained more than 2,000 districts nationwide in our professional development sessions, over live feedback, or email assistance if phone, chat, or email.

Competing Program – Through our consulting services, we can help you with all aspects of your competition needs.

You will receive direct access to our most trusted experts in online education who can share their best practices and innovative ideas assimilated from our online schools in 20 states and supporting more than 2,000 districts with innovative online and blended learning solutions.

Online Courses and Titles for Your Common Core-Aligned Program

With K¹², you can choose from more than 100 math and English language arts courses and titles from the K¹² family of curricula, which are developed in alignment with the Common Core State Standards.

Full-Time or Remediated Curriculum

The Aveo Learning by K¹² Curriculum for grades K-12 is designed for middle and high school students who need remediation or acceleration for core subjects. The Aveo Learning system is a unique online courses covering core subjects, such as English, math, science, plus Foundation and Credit Recovery courses for high school students. Courses feature a rich multimedia format that includes video lessons, audio narration, games, simulations, and more. Aveo Learning also includes live debates, and more. For grades K-8, hands-on materials—such as books, manipulatives, and software—are tightly integrated with online lessons. Plus, adaptive courses are built to respond to individual student needs. Aveo Learning is designed for grades K-12 and will adjust to individualized and remedial needs.

STEM CURRICULUM AND SOLUTIONS

Courses, Resources, and Support to Prepare Your Students for Their Future

www.k12.com 

Helping Schools and Districts Strengthen STEM Education

Without a doubt, it's a national priority.

Science, Technology, Engineering, and Mathematics (STEM) education in the cornerstone of America's continued leadership in the 21st century. Of the 30 occupations that are expected to grow the fastest over the next decade—as identified by the U.S. Bureau of Labor and Statistics—almost all will require at least some background in STEM. Yet in 2012, only 40 percent of U.S. high school graduates were ready for college work in math and only 31 percent, according to a report by ACT, in independent research finds that focuses on education and workforce development.

With all of the pressing challenges that your school or district faces, how will you be able to prepare your students for the future?

Delivering the Focused STEM Resources You Need

K¹² provides a comprehensive STEM offering including courses, online and blended learning solutions, and support—as well as engaging platforms, tools, and resources. Our STEM offerings include the following:

- Extensive course catalog
- Special programs and activities
- Curriculum resources

K12's award-winning curriculum and services have been used by almost 500,000 students in 85 countries and six continents.

Letter from the CEO

- K12 is leading the transformation to individualized learning, which aims to customize instruction to meet each student's unique capabilities, interests, and needs.
- K12 is one of the most "public" of public schools, open to every child based on choice, not geographic location or economic means.
- Online learning, as it achieves mainstream acceptance, faces new challenges as it seeks to help a greater variety of students succeed. This includes students with special needs, English language learners, students with disabilities, students with special needs, high mobility rates, and the complexities of measuring academic progress under these conditions.
- In K12's early years, students in K12-managed public schools scored at or near state averages on widely used standardized tests. Now, K12 students score higher than their peers on state tests. This year, K12 students' average scores on state-mandated, increased-stakes standardized test scores have exceeded state averages. We estimate that from 50% to 70% of students attending our largest schools did achieve proficiency in math on state exams they took in the year before, according to K12's latest data. And our students did this while attending K12-managed public schools, which are among the lowest performing public schools, absent of the students taking state-required tests as in their first year in K12's program—thus, their scores reflect more accurately the achievement of K12 students.
- K12 believes that widely used standardized assessments suffer serious limitations as measures of progress in an individualized learning environment. We submit that a more accurate method for measuring student performance is the progress a student makes over the course of a year, and that K12's academic report cards provide this information. In the 2012-2013 school year, K12 students in K12-managed public schools, in aggregate, saw group gains in reading based on the results of the state challenges facing individualized learning and to just practice what they learn. As a result, we are excited about how this, and teacher support, K12 is seeking to partner with school graduation rates.

"By the time Mollie was in fourth grade, she was testing right where she needed to be—at grade level—and even slightly above the national average."

"It's Incredible to See the Change in Mollie."

Household Income: Serving More Economically Disadvantaged Students

Since the 2009-2010 school year, K12-managed public schools have seen a steady increase in the number of economically disadvantaged students enrolling in the schools. This is because many students whose free and reduced-price lunches are considered economically disadvantaged.

The following chart shows the percentage of students qualifying for free and reduced price lunches in the schools

targeted K12-managed public schools for the last four school years. These numbers compare K12's free and reduced price lunch enrollment to the total enrollment for all K12-managed public schools as of December 2012.

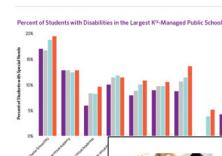

2013 K12 Academic Report

Students with Disabilities: Growing Faster Than National Average

Online public schools are no different from traditional public schools in their requirement to serve students with disabilities. K12-managed public schools have seen an increase in the number of students with disabilities since the 2009-2010 school year, and currently serve more than 10,000 students with disabilities. The overall percentage of students with disabilities in K12-managed public schools is slightly lower than the national average (US Dept. of Ed.). The largest K12-managed public schools for the 2012-2013 school year compared with approximately 28k

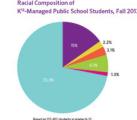

students, but in many of K12-managed public schools, the rate has been increasing faster than the national average, which suggests that there is growing acceptance of the ability of online schools to meet the needs of students with disabilities.

The following chart shows the percentage of students with disabilities served on the largest K12-managed public schools for the 2012-2013 school year. These schools comprise 67% of the enrollment for all K12-managed public schools as of December 2012.

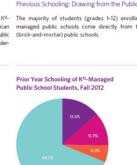

Student Race: A More Diverse Population

More students from minority backgrounds are enrolling in K12-managed public schools than in earlier years. Although African American enrollment roughly mirror that of the general public school population, Hispanic and Asian students remain underrepresented.
